For You

APP

GAME

Run quests that lead Early-adopters to become real users of your product

Cool products have a set of unique features in general that can attract many users. In Reviewhunt, makers can make serial quest missions that lead users to embark on the product journey.

Quests and Reviews

\$10

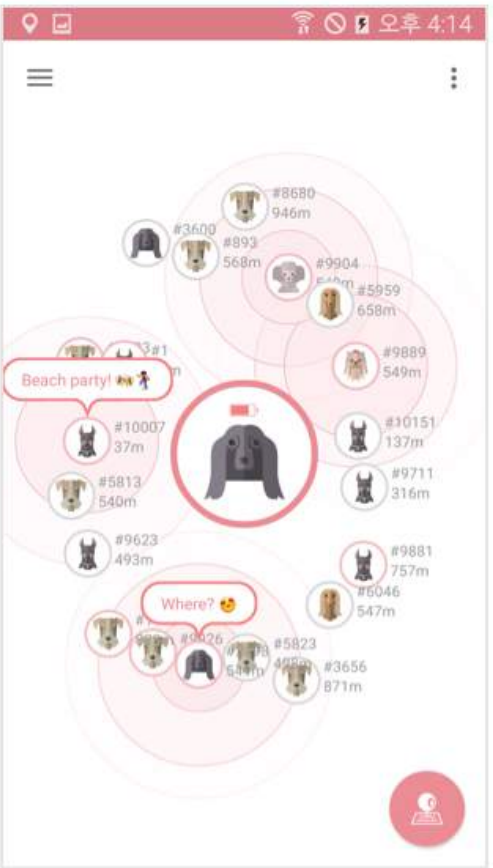

QUEST 1 \$2

Make your first bark.

Bark transforms people nearby into fun barking dogs. Every user chooses one of the 8 different dog breeds and chats with other barkers by communicating like dogs.

Make your first bark on your location, and see how other dogs (users) barking back to you. Take some good screenshot of your barking situation.

QUEST 2

Become a top dog in your territory.

Take over territories and change the name of the location by following territorial actions.

You can become a top dog in your 2km territory by barking the most. When you become the top dog, you can change the name of the territory whatever you want.

Become a top dog, change the name of your territory, and share the screenshot.

JOIN THE QUEST

Over 22,000 tech influencers are ready to try your products

Reviewhunt is built on top of Steemhunt - the biggest tech community in blockchain. Our hunters love to dig out new products and talk about them with others. Over 65,494 new products are shared within the Steemhunt community, and they will be your early users.

CASE STUDY - BARK APP

HOW TO SET REVIEW CREDIT

Set quests and decide **bounty price** for each quest

Set **max number** of hunters you want to participate

Total review credit is calculated with sum of total quest bounties

	Quest 1 Make your first bark.	\$1
	Quest 2 Become a top dog	\$2
	Review Leave App Store review	\$3
	Buzz Spread the app	\$0-\$100

Max hunters = 200

Total Review Credit
\$11,200

Hunters with own social/community channels will create quality custom content about your product
