Run quests that lead Early-adopters to become real users of your product

Cool products have a set of unique features in general that can attract many users. In Reviewhunt, makers can make serial quest missions that lead users to embark on the product journey.

Quests and Reviews

61% remaining $10
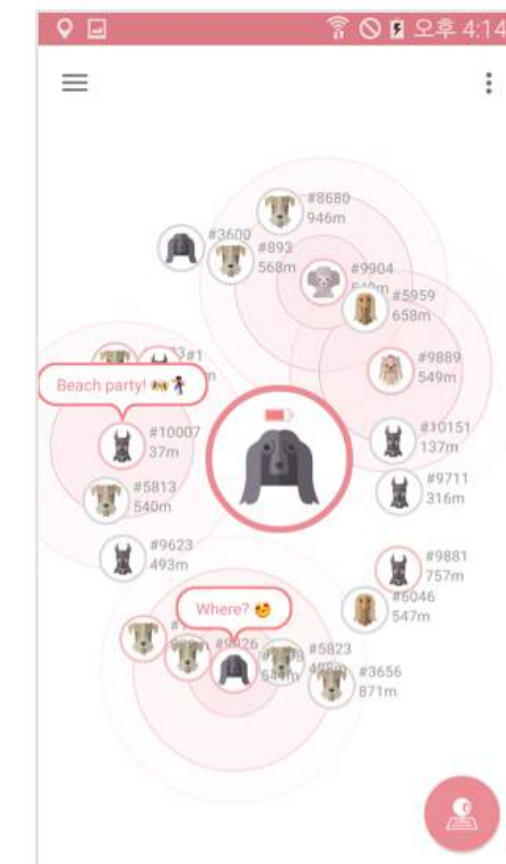

QUEST 1

Make your first bark. $2

Bark transforms people nearby into fun barking dogs. Every user chooses one of the 8 different dog breeds and chats with other barkers by communicating like dogs.

Make your first bark on your location, and see how other dogs (users) barking back to you. Take some good screenshot of your barking situation.

QUEST 2

Become a top dog in y

Take over territories and change name of the location by followin territorial actions.

You can become a top dog in yo 2km territory by barking the mos you become the top dog, you can the name of the territory whatev want.
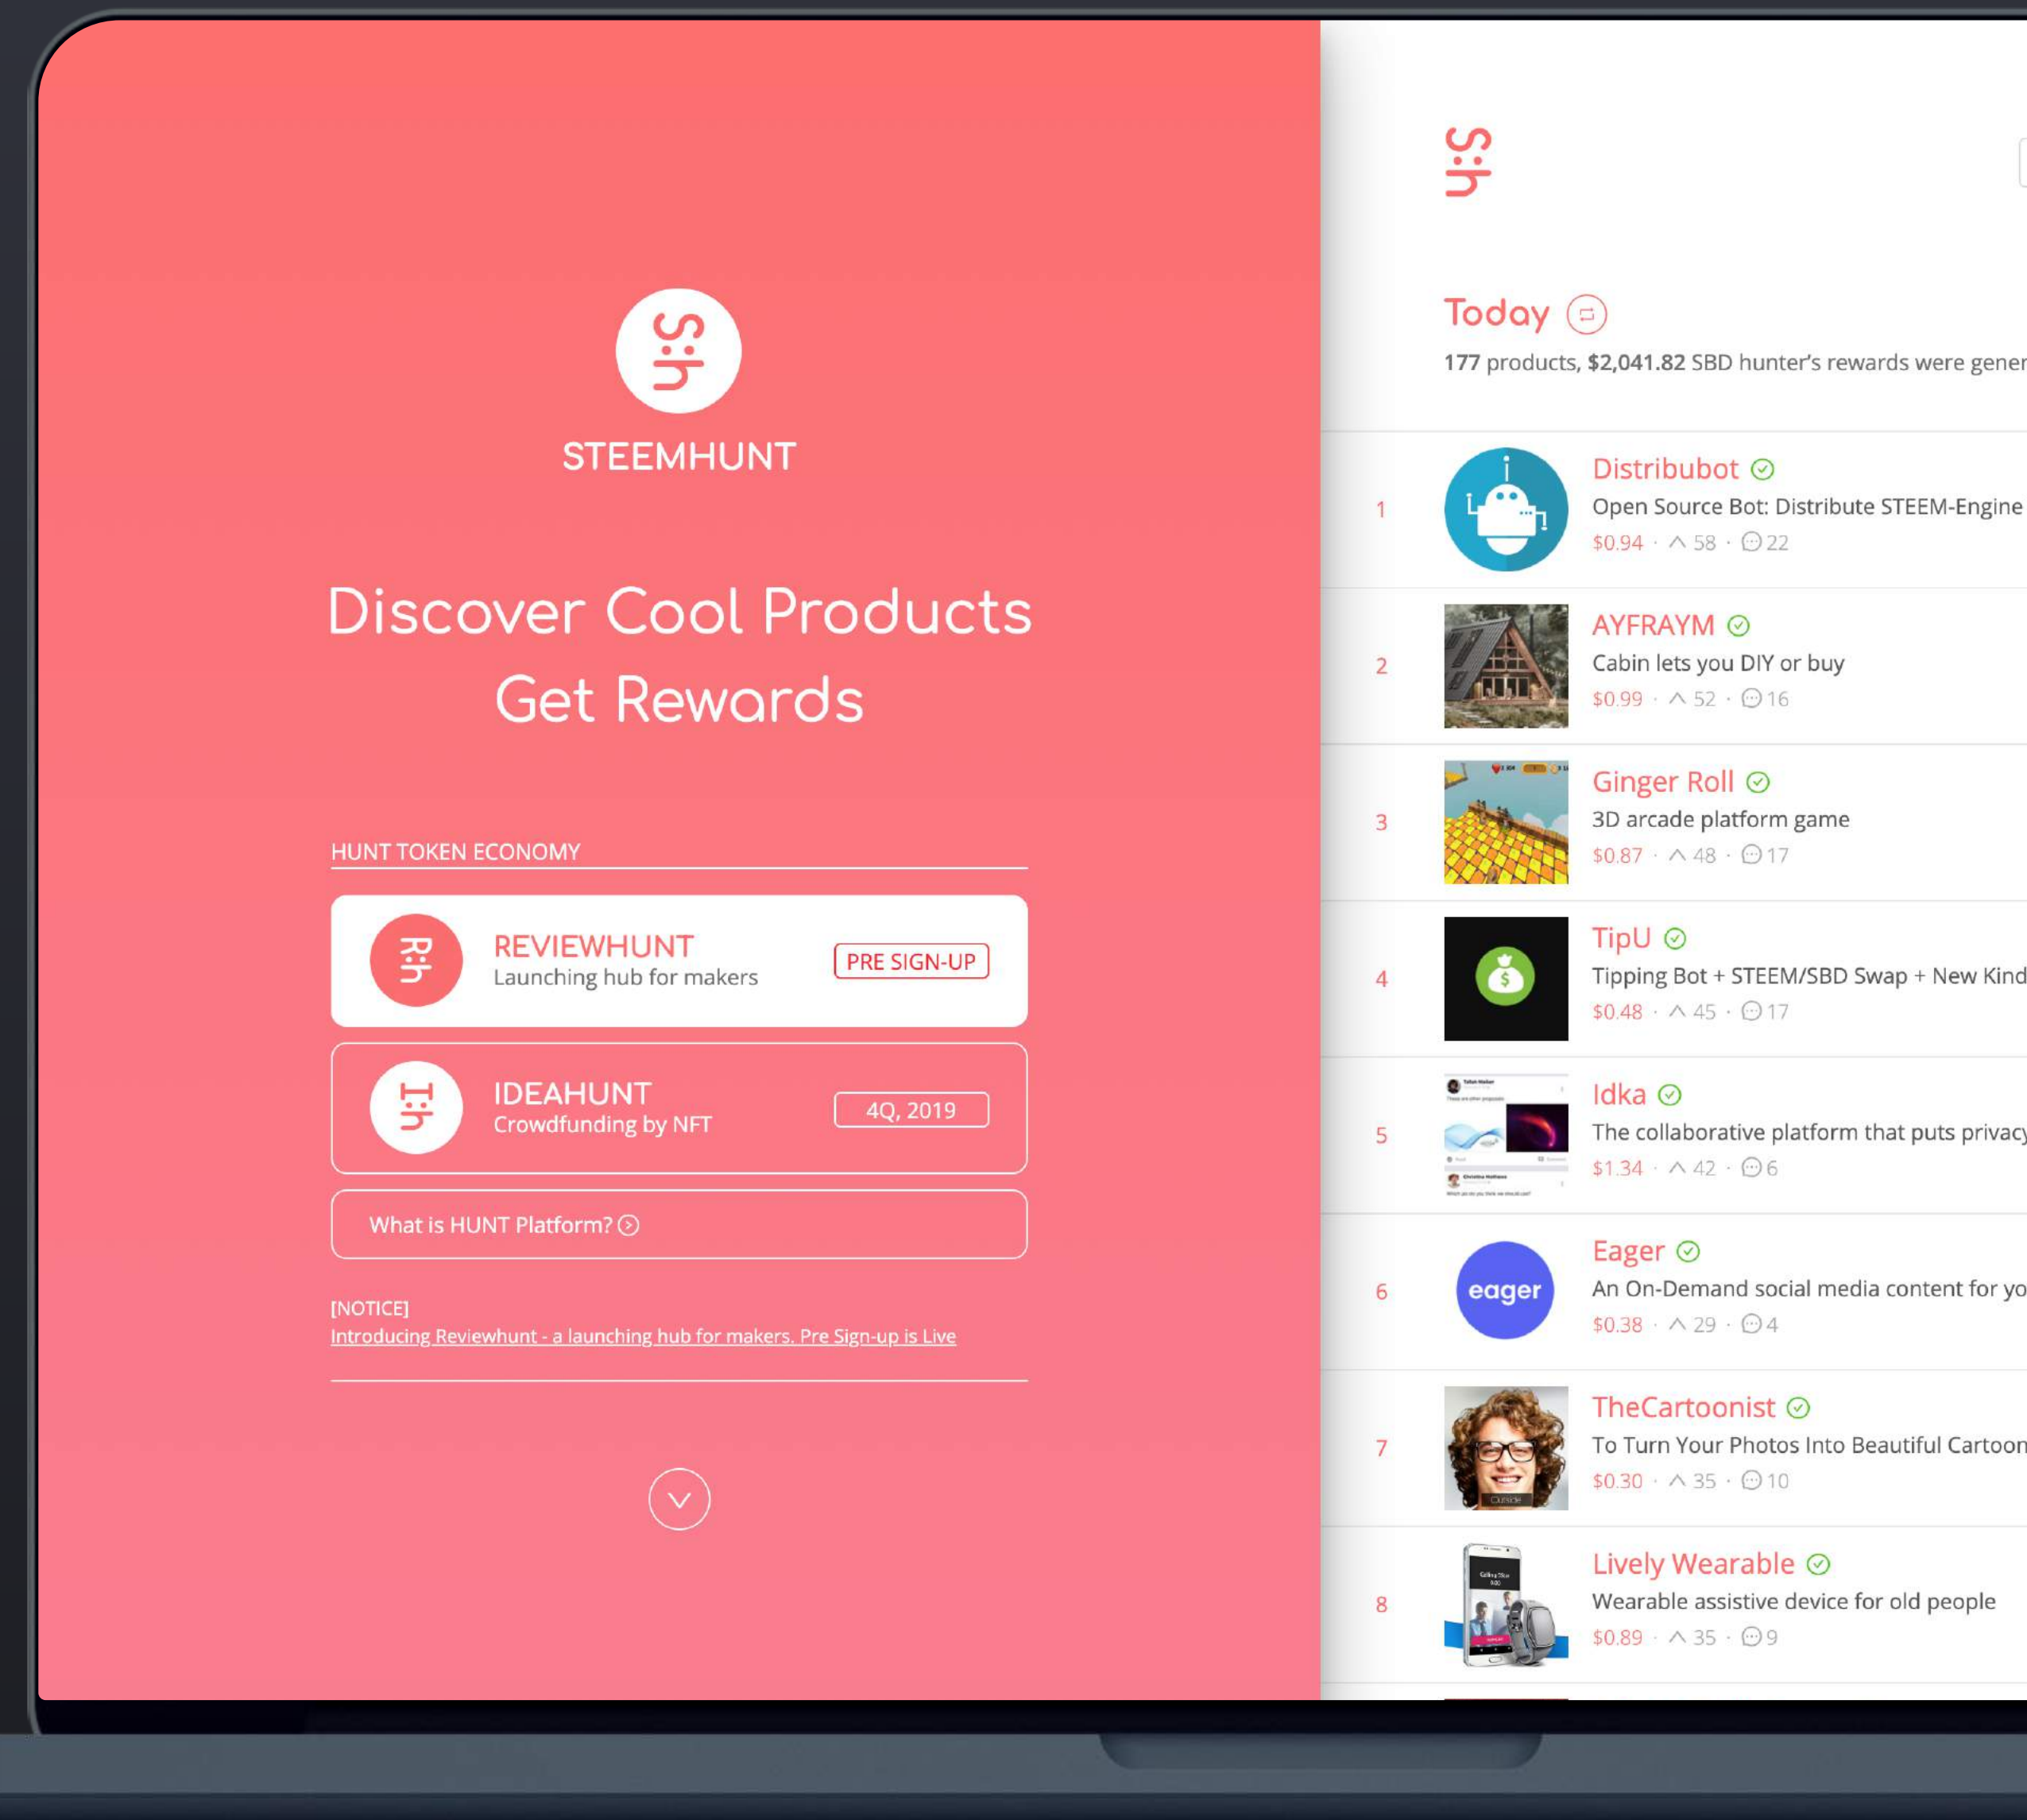

Become a top dog, change the n your territory, and share the scre

QUEST SUBMISSIONS

No abuse worries with our double-folded moderation system

Reviewhunt runs a double folded moderation system consisting of hunter score and content moderation.

1) We monitor hunter's activities using our algorithm, and evaluate automatically the value of each post, and blacklist anyone found attempting to abuse the system.

2) We run a moderation system that checks all content submissions and protects from low quality reviews.
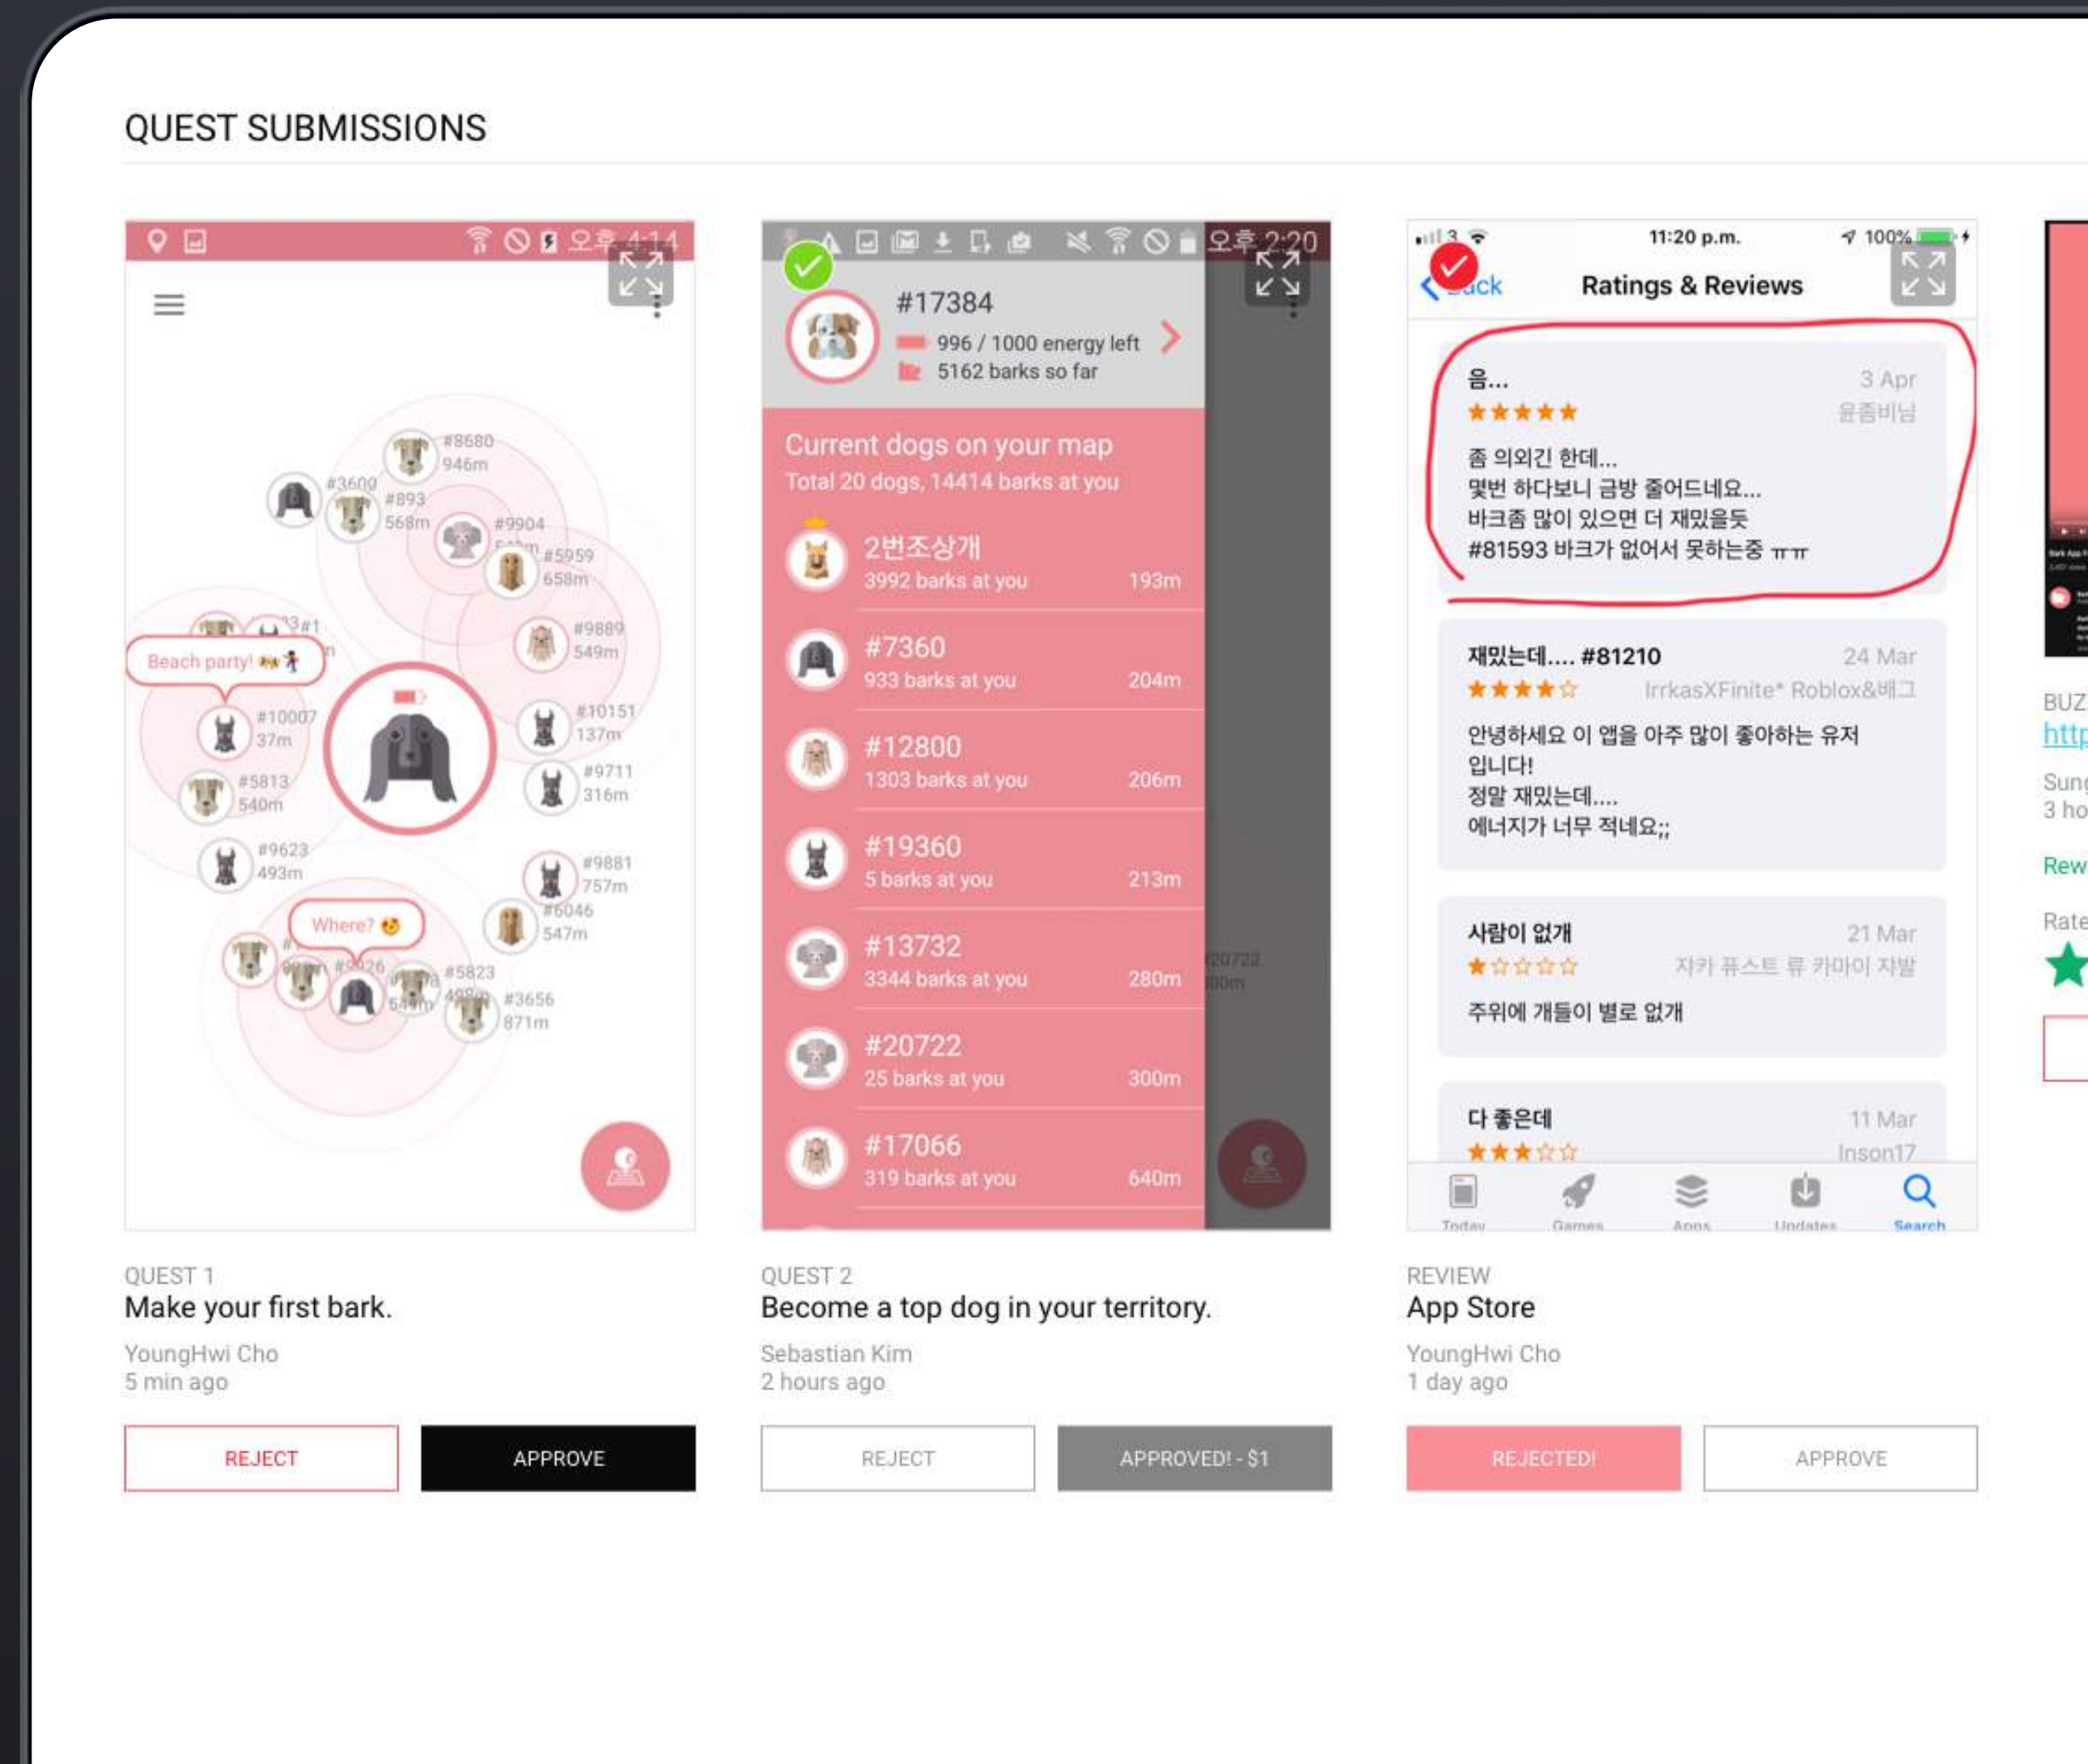

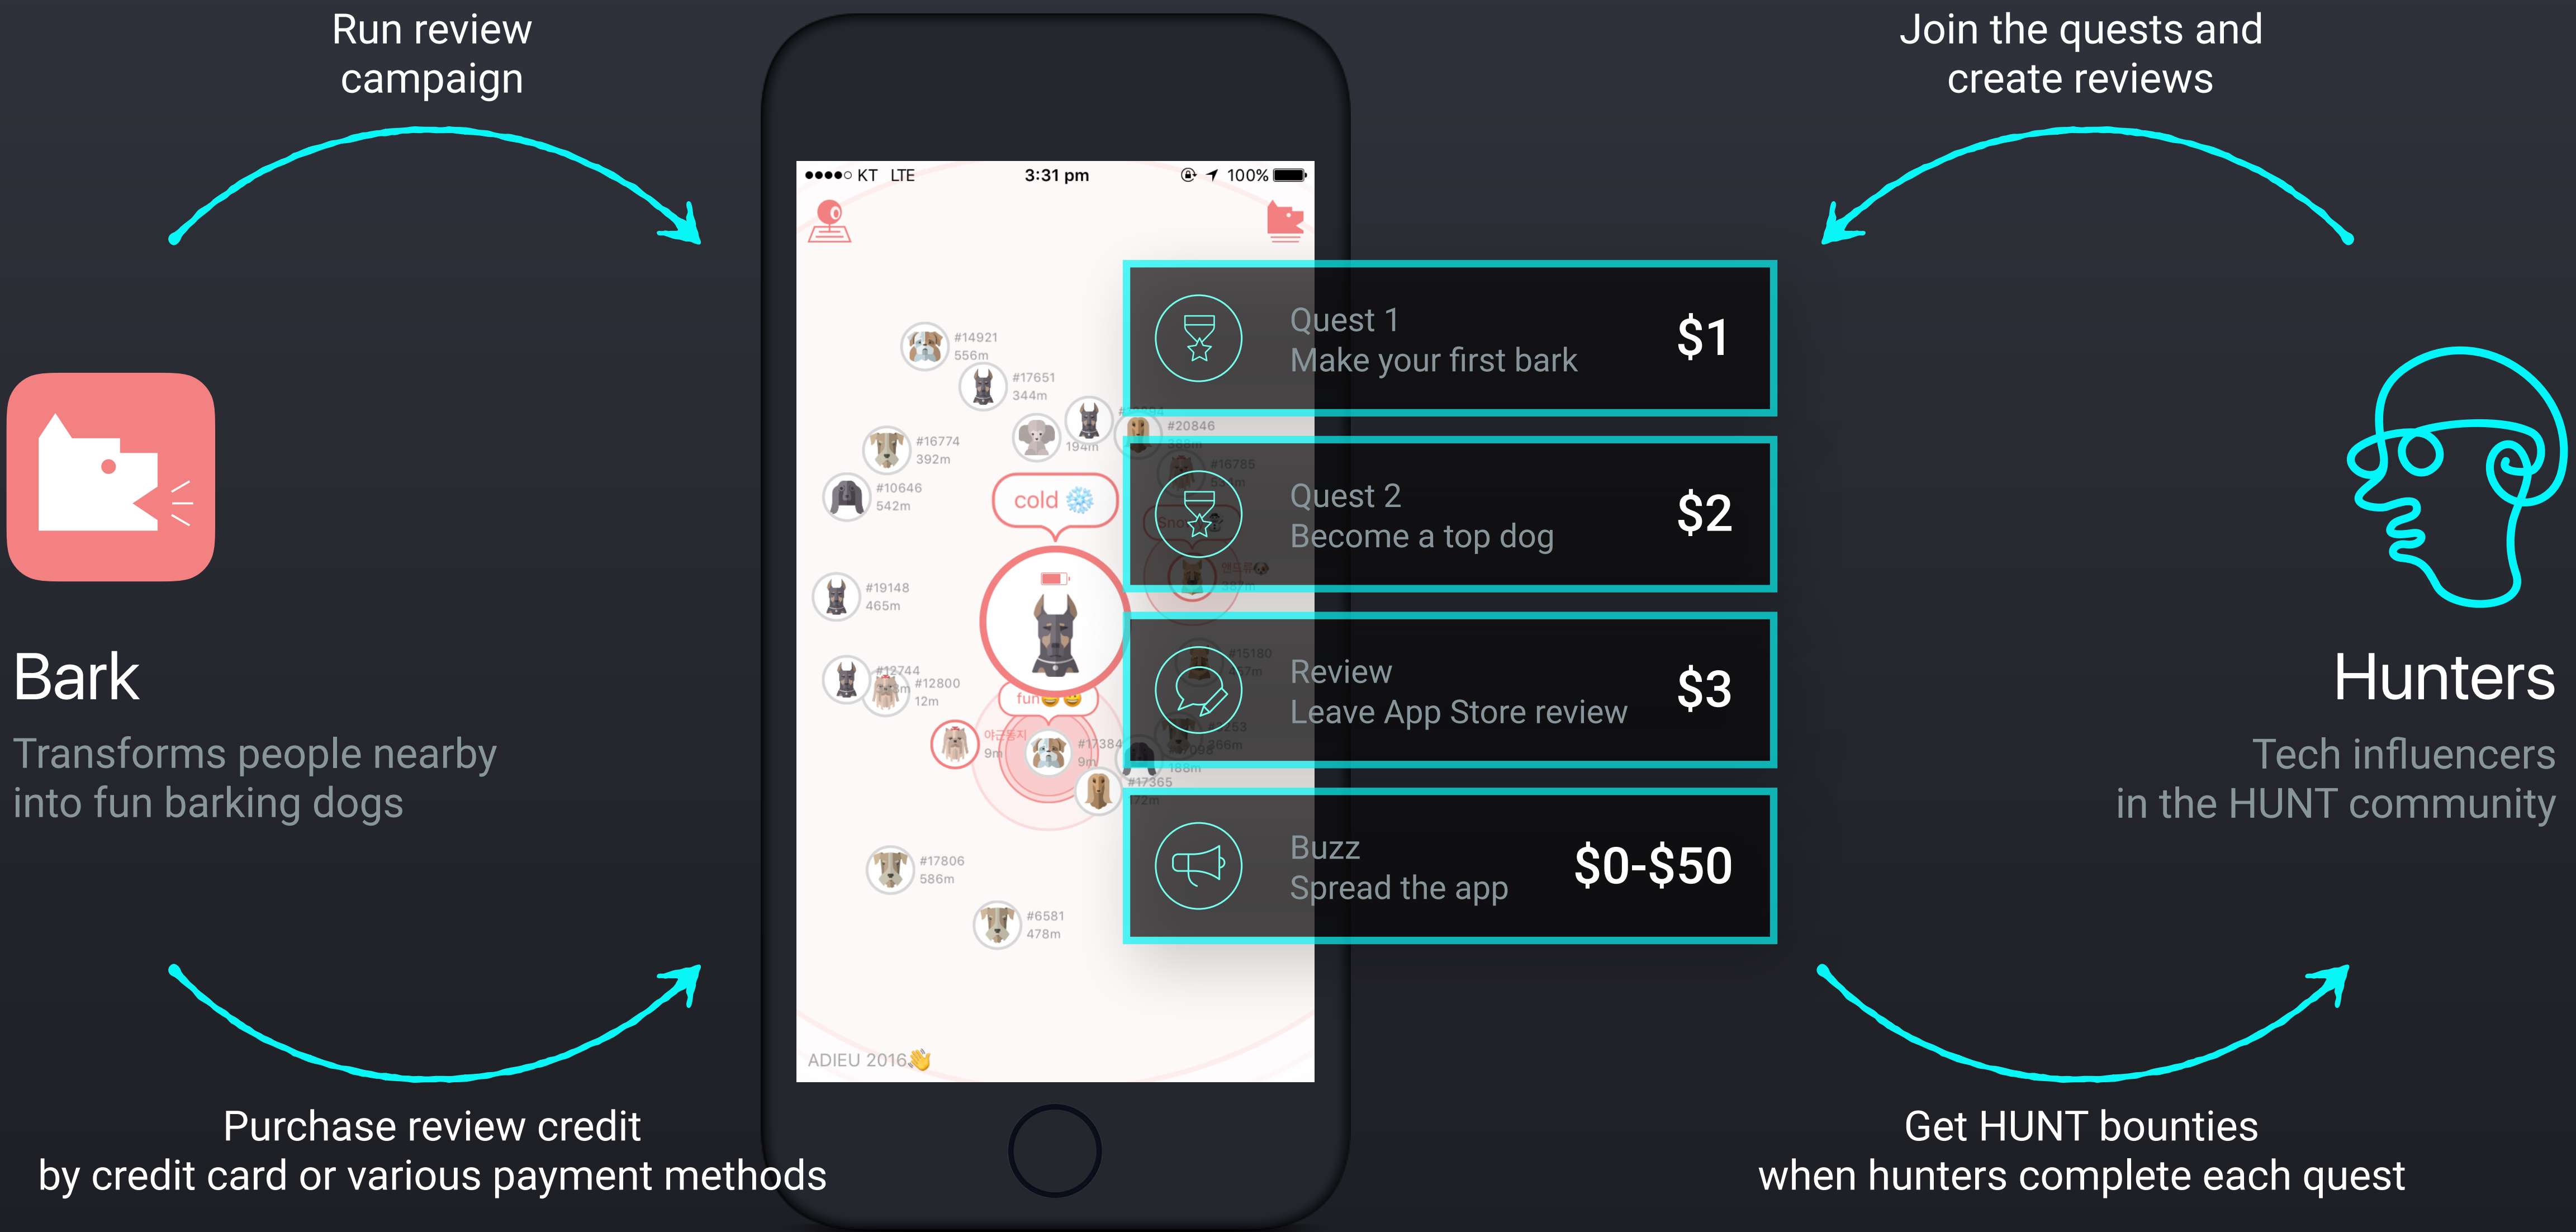

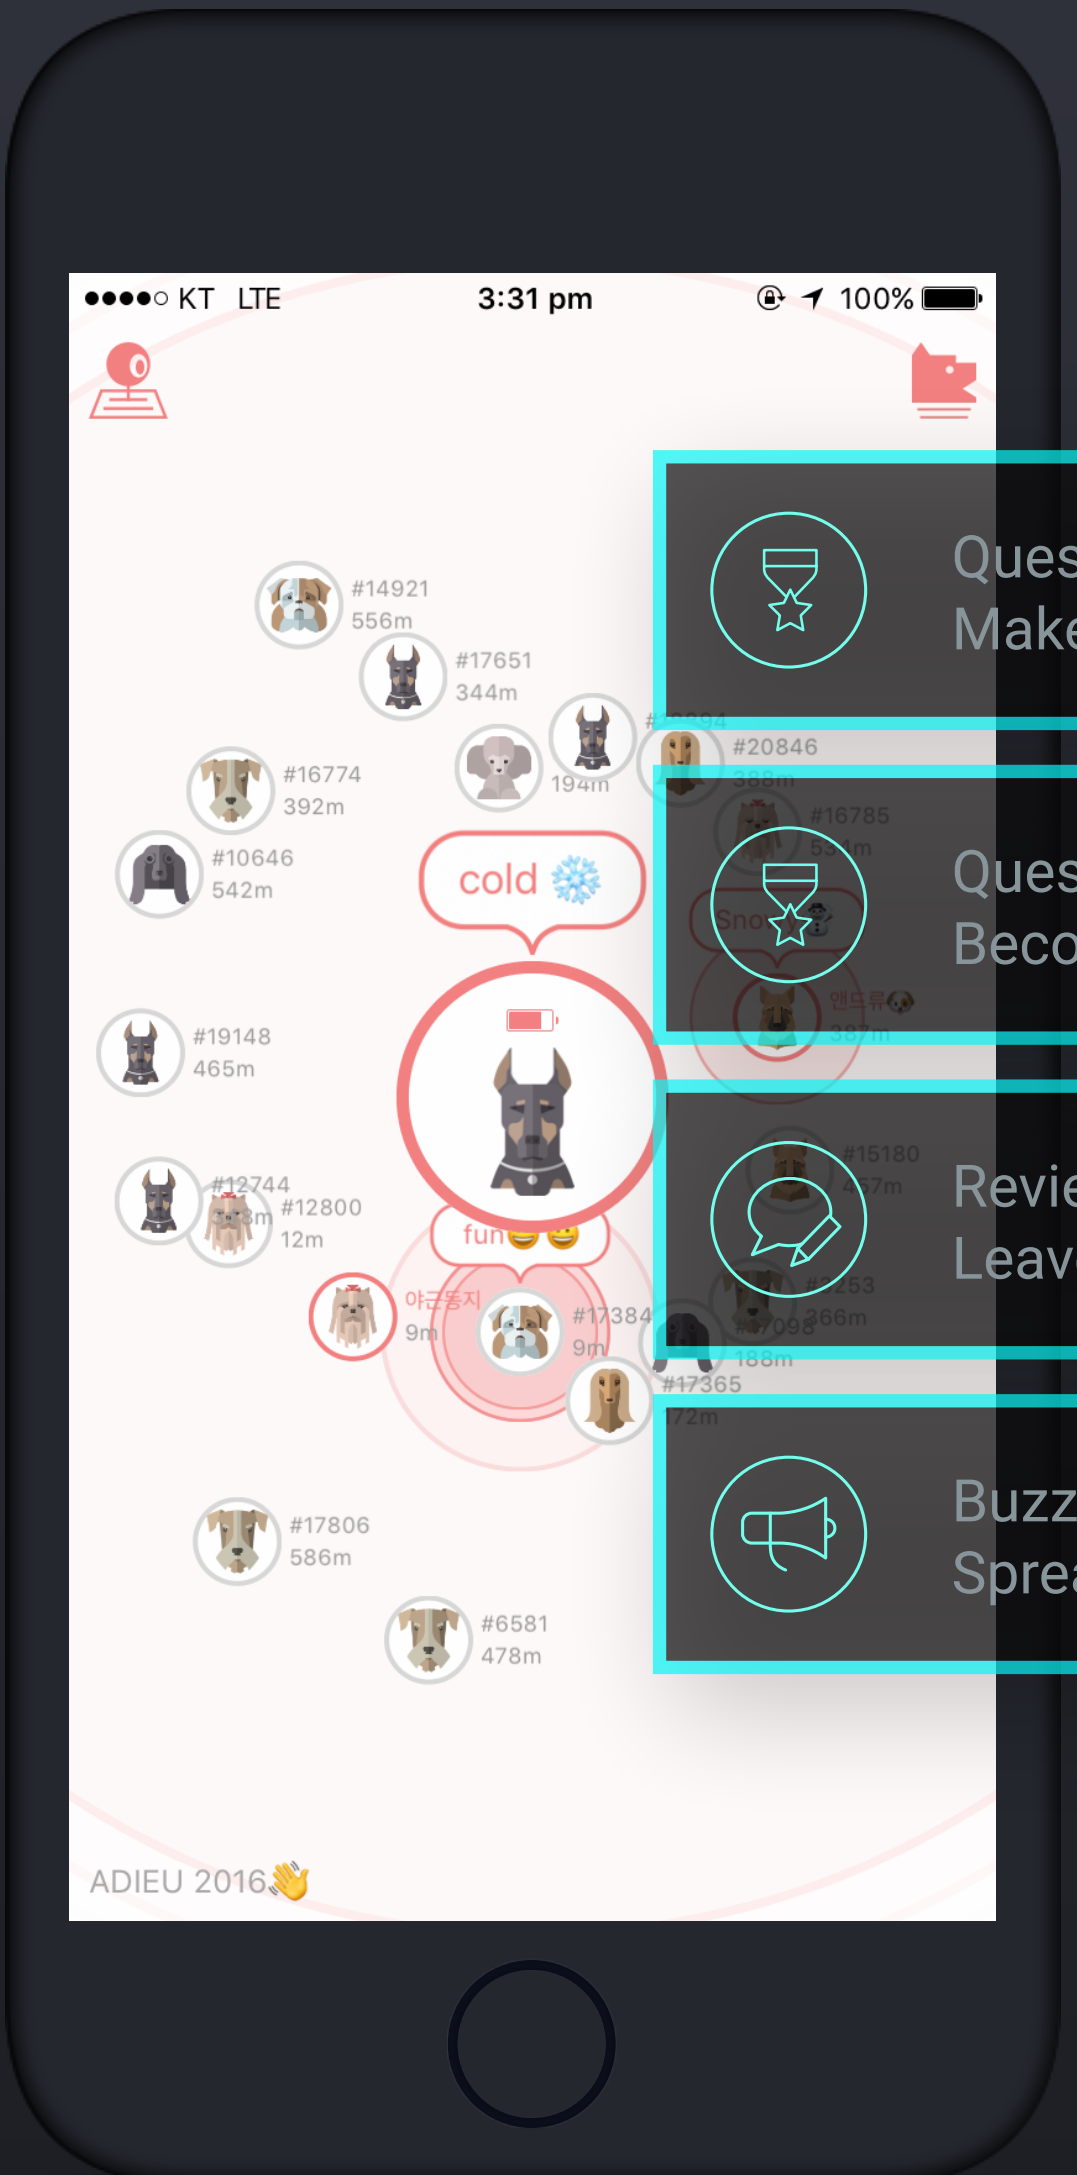

HOW TO SET CAMPAIGN BUDGET

Set quests and decide bounty price for each quest

×

Set max number of hunters you want to participate

=

Total review credit is calculated with sum of total quest bounties

---

Quest 1 Make your first bark.	$1
Quest 2 Become a top dog	$2
Review Leave App Store review	$3
Buzz Spread the app	$0-$50

Max hunters = 257

Total Review Credit
$5,000

* This is an example of the budget setting. The actual budget will vary based on the amount of buzz channels and max reward per buzz content that you choose.
